Introduction

Welcome to **TRUMP CASTLE II**, the all new Ultimate Casino Gambling Simulation inspired by the fabulous Trump Castle Casino Resort by the Bay in Atlantic City. Enjoy all the glamour, games and thrills of trying to capture a king's ransom - just as if you were actually inside Trump Castle.

Experience the super-charged atmosphere as you move about the spectacular casino. Catch conversations around the gaming tables and explore the luxurious accommodations and facilities of this deluxe resort by the bay. Digitized photos, animation, plus realistic graphics and sound bring the king-size excitement of Trump Castle right to your computer screen.

TRUMP CASTLE II offers six popular gambling games - Baccarat, Blackjack, Craps, Roulette, Video Poker, and Slots - each with multi-player capabilities. Enjoy simultaneous casino action for up to four players, or practice strategies playing multiple hands. Game play follows the rules and regulations of the New Jersey Casino Commission (except Video Poker).

Your complimentary Trump Castle Gaming Guide is a handy reference on the odds and payouts for your wagers. Plus, you'll find a discount coupon to stay at the Trump Castle Casino Resort - a valuable bonus, good for your next visit to Atlantic City.

From the VGA digitized photos, animation and sound to the realistic game play, multi-player capabilities, free gaming guide and more - **TRUMP CASTLE II** sets a new standard for casino computer programs. So get ready for unlimited excitement and fun. Whatever your game, it's a safe bet you'll love the challenge and thrills of **TRUMP CASTLE II**. Good Luck!

*These rules and regulations may change from time to time. Always confirm all rules in effect prior to actual gambling.

Getting started

Requirements

In order to run Trump Castle II you will need the following equipment:

- An IBMPC, XT, AT, PS/2, PS/1, Tandy 1000 or fully compatible machine with a CGA, EGA, VGA or MCGA video card.
- 512K RAM for Tandy 16, CGA and EGA. 640K RAM for VGA and MCGA.
- At least one disk drive; a hard drive with at least 2 megabytes available is optional, but recommended.
- Joystick or mouse is optional.
- Ad Lib sound card is optional

NOTE: Please be sure you have the computer properly hooked up and are familiar with its operation. If there are questions about the computer, please refer to your owner's manual.

Mouse users: Make sure that your mouse driver is loaded before running Trump Castle II.

Loading

Single-drive systems

Insert Trump Castle Disk 1 into drive A. At the A> prompt, type TC2 and press the ENTER key. The program will automatically detect the hardware that you have in your system. If you have a problem with the program detecting any of your hardware (i.e. sound card, graphics card), refer to the Command Line Parameters information later in this section.

Hard disk systems

NOTE: To install and run Trump Castle II on a hard disk, the hard drive must have an identifier of C or above. Hard drives identified by DOS as A or B will not be accepted by the program.

Before you can run Trump Castle II from your hard disk, you must install the software. To install Trump Castle II on your hard drive, insert Trump Castle II Disk 1 into your A drive. Type **A:** and press **ENTER**. At the **A>** prompt type **INSTALL** and press **ENTER**.

The default directory into which Trump Castle II is installed is **C:\CAPSTONE\TC2**. If you would like to install into a different directory, enter the path name when requested.

The install program will prompt you to insert each disk, and will copy them onto your hard drive.

To run the program from your hard disk, type the following from the **C>** prompt.

CD \CAPSTONE\TC2 <ENTER>

TC2 <ENTER>

If you installed the program to another drive or directory, substitute the correct drive letter and path name.

IMPORTANT NOTE:

To enjoy the highest quality sound and animation, it is necessary to start with a fairly 'clean' system. It is important that no memory resident software gets in the way of this program. A simple way of insuring a 'clean machine' is to make a boot disk that does not install anything but DOS. You may want to use the DOS disk that came with your computer. This will allow you to boot the computer (from floppy) without having to change the **CONFIG.SYS** and **AUTOEXEC.BAT** files on your hard disk.

VGA users: If the program detects that you do not have enough memory available to run the program in VGA, it will run the program in EGA mode.

Command Line Parameters

Trump Castle II can be run with command line parameters in order to force it into different video and sound modes. Below is the usage, followed by all of the available options.

Usage: **TC2 /mode /music /sound /machine speed**

Mode options:

/TGA - force Tandy 16 mode
/CGA - force CGA
/EGA - force EGA mode
/EGAHI - force high resolution EGA mode
/MCGA - force MCGA, VGA mode

Music options:

/SPKR_MUS - music through PC speaker
/TNDY_MUS - music through Tandy speaker
/PS_1_MUS - music through IBM PS/1
/ADLB_MUS - music through Ad Lib card
/RLND_MUS - music through Roland MT-32
/GMBL_MUS - music through Game Blaster
/NO_MUS - no music

Sound options:

/SPKR_SFX - sound through PC speaker
/SNBL_SFX - sound through Sound Blaster
/TNDY_SFX - sound through Tandy speaker
/PS_1_SFX - sound through IBM PS/1
/NO_SFX - no sound effects

Machine speed options:

/FAST - run with digitized graphics
/SLOW - run without digitized graphics (this option is recommended for machines slower than 8 Mhz.)

PS/2 USERS: If your PS/2 is equipped with an MCGA graphics card, problems may occur if you do not have enough free memory. If when you run the program, your computer locks up, you will need to execute the program using the **/CGA** command as described above.

Starting the Program

Once loaded, the program will display an opening sequence. At any point during the opening, press the **SPACE BAR** to start the game.

Copy protection

After the program displays the opening sequence, you will be asked to enter a word from the enclosed *Trump Castle Gaming Guide*. Look under the indicated heading in the gaming guide and type in the requested word and press **ENTER**.

Player's names

Before you start playing the games, you are asked to enter the names of one to four players. Enter the name for Player #1 and press **ENTER**. Continue for each player that is going to play. After you have entered all of the players' names, press the **F9** key or point at the **GO ON** button on the lower right and press the mouse or joystick button.

Retrieve Saved Game

If you would like to load a previously saved game, press **F1**. The names of the most recently saved games will be listed. Press the corresponding function key to load, or **F10** to cancel.

Input Devices

The Trump Castle II program can use either the keyboard, joystick or mouse for user input.

Keyboard:

If you do not have a mouse or joystick, you can use the keyboard to control the game.

Each of the six games has options displayed at the bottom of the screen. Some of the options have function key names next to them. To activate one of these options, press the corresponding function key. Other options have one of the letters of the option highlighted. To choose some of these options,

hold down the **ALT** key and press the corresponding highlighted letter. Others can be chosen by simply pressing the letter on the keyboard. See the Games section for details on making selections

Joystick

Use the joystick to move the pointer around the screen. Press the **FIRE** button to 'click' on items.

Mouse

Move the cursor around the screen. Press the left mouse button to 'click' on items.

Special keys

Below is a list of keys used throughout the program

ALT-M - toggle music (Doesn't work if **/NO_MUS** command line parameter was used)

ALT-S - toggle sound effects (Doesn't work if **/NO_SFX** command line parameter was used)

CTRL-ESC - Exit straight to DOS (doesn't save high score)

SPACE - highlight click area

F10 - show all click areas

Help

On-line help is available in each of the six games. To access the help screen from within a game press **ALT-H** or click on the **Help** box. See the sections on each game for more details on how to use the help screens.

Bankroll

Each time you start the game, you will have \$1,000. You can use this money anywhere in the casino. Use all of your gaming ability to build upon this bankroll. If you have one of the 10 highest bankrolls when you quit the game, you will be added to the Top Ten list.

Playing the Game

Trump Castle II uses a point and click interface, but there are keyboard shortcuts for all the commands. Each screen in the game has one or more areas that you can 'click'-on to select an option or perform some type of action. Also, many of the people in the program have things to say. By repeatedly pressing the SPACE BAR or right mouse button, you can highlight each area that is available on any given screen. Also, pressing F10 will show you a box around each and every available click area on the screen.

To select an area with a mouse or joystick, point at the area and press the button. To select an area with the keyboard, press the SPACE BAR until the desired area is shown, then press the ENTER key.

The first thing you will see after the opening sequence is the lobby. From the lobby you can access any of the following options: (CGA users: In CGA the program will not display the lobby. Each option will be listed on the screen, 'click' on the desired option or press the corresponding function key.

Exit the casino

Visit the cashier (not available in CGA)

Visit the east hallway (not available in CGA)

Visit the west hallway (not available in CGA)

Read the hotel newspaper (not available in CGA)

Save the game

Play roulette

Play craps

Play blackjack

Play poker

Play baccarat

Play slot machines

Descriptions of each option follow.

Exit the casino

Choose this option to leave the casino. You will be downstairs preparing to get on the Trump Castle bus. Choose the bus to leave the game, then press Ctrl-Esc. to exit to DOS.

Visit the cashier

If you run out of money, you can go to the change booth and receive \$1,000.

CGA users: If you run out of money, you will be given \$1,000 when you exit the game you are currently in.

Visit the east hallway

You will be looking down the east hallway of the casino. There are several things here that you can take a look at, and rooms that you can go into. (Remember pressing the Space Bar will show you everything that is available.)

Visit the west hallway

You will be looking down the west hallway of the casino. There are several things here that you can look at.

Read the hotel newspaper

You can scan through to see what is happening at the casino. High scores are always shown on Page 3.

Save the game

The program will show you the players' names and their bankroll amounts. Enter a valid filename up to 8 characters in length and press ENTER. The program will save the cur-

rent game to that file. The program can only save ten games. Each time you save a new game, the oldest previously saved game is erased.

THE GAMES

If you are not familiar with basic casino rules, please refer to the *Trump Castle Gaming Guide* included in this package. It explains the basic rules for Blackjack, Roulette, Craps, Baccarat, and Slots. Help is also available in each of the games.

By selecting a game you will go to that area of the casino. You can see what the other players have to say and then play the game.

CGA users: When you select a game, you will go directly to that game. You will not have the opportunity to have the characters in the games talk.

Roulette

After selecting roulette from the lobby, you will find yourself standing around the roulette table with several people. Most of the people here have something to say. Use the space bar to see the different options that are available. When you are ready to play, 'click' in the middle of the table. Trump Castle II offers two types of roulette, 0 and Double 0. When asked, choose the one that you want to play. You will then be asked to select the table minimum.

Placing bets

The name of the current player, along with their chip color and bankroll appears on the upper part of the screen. Each player can take turns placing bets between each spin. To switch the current player, either 'click' on the current player's name or press the F8 key.

With a mouse or joystick

Place the pointer over the table at the point at which you would like to place your bet and 'click' the button. A box will appear around the selected spot. Select the amount of the bet by 'clicking' on the chips on the bottom of the screen. The value of the chips are, from left to right, \$1, \$5, \$25, \$100, \$500. For example, to bet \$55, 'click' twice on the \$25 chip and once on the \$5 chip. Each chip is added to your bet because the + on the bottom of the screen is highlighted. To bet the maximum allowable bet, 'click' on the Max box. To bet the minimum allowable, 'click' on the Min box. The total amount of the current bet is displayed on the lower righthand portion of the screen. Continue placing bets in this manner.

To reduce a bet, 'click' on the - box on the bottom of the screen. Now, each time you 'click' on a chip, that amount is subtracted from your bet. Remember to 'click' on + when done subtracting.

When all bets are placed, 'click' on the Spin the Wheel box.

With the keyboard

A box surrounds the currently selected betting position. Use the cursor keys to move the box around the board. Once the box is positioned over the desired bet location, use the function keys to place the chips down. Each time you press a function key, the amount of that chip is added to your bet because the + on the bottom of the screen is highlighted. The chips are, from left to right \$1, \$5, \$25, \$100, \$500. To place the maximum allowable bet, press Alt-X. To place the minimum bet, press Alt-N.

To reduce a bet, press the - key on your keyboard. Now, each time you press F1-F5, the amount of that chip is subtracted from your bet. Remember to press + when done subtracting.

When all bets are placed, press F9 to spin the wheel.

Clearing a bet

To clear a bet off of the roulette table, position the betting box over the bet and 'click' on the C on the bottom of the screen, or press C.

To clear all the bets for the current player, 'click' on the Clear All box or press Alt-A.

Help

To access the help screen, 'click' on the **HELP** box or press **ALT-H**. The help box will appear on the top of the screen. For each type of available bet, the name of the wager is given along with the odds and an example of where the bet would be placed. The bets are lettered A through L. 'Click' on any of the letters, or press the corresponding key on the keyboard to see an example. A chart of all allowable bets is also available by pressing **F2**. This chart is also printed in the Gaming Guide.

When you are finished with the help screen, 'click' on the **GO ON** box or press **F9**.

Quit

To go back to the lobby of the hotel, 'click' on the **Quit** box or press **ALT-Q**.

Craps

After selecting craps, you will see the craps table with several other guests standing around. You can see what they have to say and then 'click' in the middle of the table to play. You will be asked to select a table minimum.

The name of the current player, along with their chip color and bankroll amount will be displayed on the upper portion of the screen. Each player can take turns placing bets between each roll of the dice. To switch between players, 'click' on the current player's name or press the **F8** key.

Placing bets

With a mouse or joystick

Place the pointer over the table at the point at which you would like to place your bet and 'click'. A box will appear around the selected spot. Select the amount of the bet by 'clicking' on the chips on the bottom of the screen. The value of the chips are from left to right, \$1, \$5, \$25, \$100, \$500, \$1000. For example, to bet \$125, 'click' on the \$25 dollar chip and then on the \$100 chip. Each chip is added to your bet be-

cause the + on the bottom of the screen is highlighted. To bet the maximum allowable bet, 'click' on the **Max** box. To bet the minimum allowable, 'click' on the **Min** box. The total amount of the current bet is displayed on the lower part of the screen. Continue placing all bets in the above manner.

To reduce a bet, 'click' on the - box on the bottom of the screen. Now, each time you 'click' on a chip, that amount is subtracted from your bet. Remember to 'click' on + when done subtracting.

When all bets are placed, 'click' on the **Roll** box to roll the dice.

With the keyboard

A box surrounds the currently selected betting position. Use the cursor keys to move the box around the table. Once the box is positioned over the desired bet location, use the function keys to place the chips down. Each time you press a function key, the amount of that chip is added to your bet because the + on the bottom of the screen is highlighted. The chips are, from left to right, \$1, \$5, \$25, \$100, \$500, \$1000. To place the maximum allowable bet, press **Alt-X**. To place the minimum bet, press **Alt-N**.

To reduce a bet, press the - key on your keyboard. Now, each time you press **F1-F5**, the amount of that chip is subtracted from your bet. Remember to press + when done subtracting.

Clearing a bet

To clear a bet, position the betting box over the bet and 'click' on the **C** on the bottom of the screen, or press **C**.

To clear all the bets for the current player, 'click' on the **Clear All** box or press **Alt-A**.

Help

To see help on a specific available wager, place the betting box over the wager on the board and 'click' on the **Help** box, or press **ALT-H**. A description of the bet, along with payoffs will be displayed.

Quit

To go back to the lobby, 'click' on the **Quit** box or press **ALT-Q**.

Blackjack

After selecting Blackjack, you will be seated at a blackjack table in the casino. There will be many other people around the table. You can see what they have to say and then 'click' in the middle of the table to play. You will be asked to select a table minimum (\$5, \$25, \$100, \$500).

At Trump Castle, Blackjack is played with six decks of cards.

Up to four hands can be played at any time. All four hands can be played by one player, four players can each play one hand, two players can each play two hands, or any combination.

The name of the current player along with their bankroll amount is shown at the top of the screen. If the player has any bets on the table, the total of all of his/her bets is shown in the center of the top of the screen.

The four playing positions are represented by white boxes on the screen. Press the F7 key or 'click' on the **Hand** box to switch playing positions. The current position is surrounded by a box. Press the F8 key or 'click' on the current player's name to change players.

Note: When making bets, start with the first betting position (upper right) and move clockwise.

Placing bets

With a joystick or mouse

Select a betting position and player as explained above. Select the amount of the bet by 'clicking' on the chips on the bottom of the screen. The value of the chips are from left to right: \$1, \$5, \$25, \$100, \$500, \$1,000. For example to bet \$200, 'click' on the \$100 twice. Each chip is added to your bet because the + on the bottom of the screen is highlighted. To bet the maximum allowable bet, 'click' on the **Max** box. To bet the minimum, 'click' on the **Min** box. The total amount of the current bet is displayed on the lower part of the screen. Continue placing bets in the above manner.

To reduce a bet, 'click' on the - box on the bottom of the screen. Now, each time you 'click' on a chip, that amount is subtracted from your bet. Remember to 'click' on + when done subtracting.

When all bets are placed, 'click' on the **Deal** box.

With the keyboard

Select a betting position and current player as explained above. Select the amount of the bet by pressing the function keys. Each time you press a function key, the amount of that chip is added to your bet because the + on the bottom of the screen is highlighted. The chips are, from left to right: \$1, \$5, \$25, \$100, \$500, \$1,000. To place the maximum allowable bet, press Alt-X. To place the minimum, press Alt-N.

To reduce a bet, press the - key on your keyboard. Now, each time you press a function key, the amount of the chip is subtracted from your bet. Remember to press + when done subtracting.

When all bets are placed, press F9 to deal.

Clearing a bet

To clear a bet, select the betting position and 'click' on the C on the bottom of the screen, or press C on your keyboard.

Game play

The dealer will deal cards to each position that has made a wager. After all of the hands have been dealt, a pointer will appear next to the first position. The player who has wagered in this position will be given several options at the bottom of the screen (Hit, Stand, Split, etc.). The player will make his/her choices by 'clicking' on the appropriate boxes or pressing the appropriate function keys.

When that player stands or busts, the box will move to the next position and that player can make his/her choices.

If the dealer's face card is an Ace, each player will be offered insurance. Follow the instructions on screen for placing insurance bets. 'Click' on the **Hand** button, or press F7 to place insurance on the desired hands.

After all of the players have made their choices, the dealer will either stand or take a hit. After the dealer stands or busts, all winning bets will be paid.

Help

To obtain help with the Blackjack game, 'click' on the Help box or press ALT-H.

Quit

To return to the lobby, 'click' on the Quit box or press ALT-Q.

Video Poker

When you select video poker, you will see three video poker machines. 'Click' on the center machine to play. You will be asked to choose to play the \$1, \$5, or \$25 machine.

The name of the current player and their bankroll amount is shown on the top of the screen. 'Click' on the current player's name or press F8 to change players.

Video poker allows you to play 1 to 5 coins. 'Click' on the desired number of coins, or press the indicated function key. After the coins are put into the machine, 'click' on the Deal box or press F9 to deal the cards. Below each card is a box showing its current state (Hold or Draw). 'Click' on this box, the card, or press the corresponding function key to toggle the card. After you have made your choices, 'click' on the Deal box or press F9 to re-deal.

Help

To see a chart of payoffs, 'click' on the Help box or press ALT-H.

Quit

To return to the lobby, 'click' on the Quit box or press ALT-Q.

Baccarat

After selecting Baccarat, you will find yourself seated at a Baccarat table. You can see what your tablemates have to say and then 'click' on the middle of the table to play. You will then be asked to select a table limit (\$20, \$100, \$500).

There are four places at the Baccarat table. All four places can be played by one player, four players can each play in one place, two players can each play in two places, or any combination.

The name of the current player along with their bankroll amount is shown at the top of the screen.

'Click' on the Place box or press TAB to switch between places. A box appears over the current position. Press the F8 key or 'click' on the current player's name to change players.

Placing bets

With a mouse or joystick

Select a player and one of the four positions on the table. There are 3 allowable bets at each position: Tie, Bankers, Players. Choose the desired bet by 'clicking' on it, or by 'clicking' on the ↑ and ↓ arrows that are displayed on the screen. A box will surround the currently selected bet location.

Select the amount of the bet by 'clicking' on the chips on the bottom of the screen. The value of the chips are from left to right: \$1, \$5, \$25, \$100, \$500, \$1,000. Each chip is added to your bet because the + on the bottom of the screen is highlighted. To bet the maximum allowable bet, 'click' on the Max box. To bet the minimum, 'click' on the Min box. The amount of the current bet is displayed on the lower part of the screen. Once a bet is made in one of the four places, it can be moved between the Tie, Bankers, and Players position by clicking on the ↑ and ↓ arrows shown on the screen. Place any remaining bets using the same method.

To reduce a bet, 'click' on the - box on the bottom of the screen. Now, each time you 'click' on a chip, that amount is

subtracted from your bet. Remember to 'click' on + when done subtracting.

When all bets are placed, 'click' on the **Deal** box.

With the keyboard

Select a player and one of the four positions at the table. There are three allowable bets at each location: **Tie**, **Bankers**, and **Players**. Choose the desired bet by pressing the up/down arrow keys on your keyboard. A box will surround the currently selected bet location.

Select the amount of the bet by pressing the function keys. Each time you press a function key, the amount of that chip is added to your bet because the + on the bottom of the screen is highlighted. The chips are, from left to right: \$1, \$5, \$25, \$100, \$500, \$1000. To place the maximum allowable bet, press **Alt-X**. To place the minimum bet, press **Alt-N**.

To reduce the amount of a bet, press the - key on your keyboard. Now, each time you press a function key, the amount of the chip is subtracted from your bet. Remember to press + when done subtracting.

When all bets are placed, press **F9** to deal.

Clearing a bet

To clear a bet, select the betting position and 'click' on the **C** on the bottom of the screen, or press **C** on your keyboard.

To clear all bets for the current player, 'click' on **Clear All** or press **Alt-A**.

Help

To get help with the Baccarat game, 'click' on the **Help** box or press **ALT-H**.

Quit

To return to the lobby, 'click' on the **Quit** box or press **ALT-Q**.

Slot machine

After choosing to play the slot machine, you will see several guests standing in front of a row of machines. You can see what the guests have to say and then 'click' on the rightmost machine to play.

You will be standing in front of a \$1 slot machine. The name of the current player along with their bankroll amount is shown at the top of the screen. To change the current player, 'click' on the current player's name or press **F8**.

The slot machine will accept from 1 to 3 \$1 coins. To put the coins in, 'click' on the desired box or press the indicated function key. As the coins go in, the corresponding payline lights up on the machine. After the coins are placed in the machine, it will automatically spin.

Quit

To return to the lobby, 'click' on the **Quit** box or press **ALT-Q**.
